

H-E-B Lake Austin

Austin, TX, USA

Project Overview

The new H-E-B planned at 715 S. Exposition Blvd., which will have a two-story porch and overlook Lake Austin, will be more than a grocery store. With more than 110,000 square feet (10,219 square metres) to better serve shoppers, H-E-B Lake Austin will showcase a world-class shopping experience that offers top-notch customer service and a wide variety of fresh foods and quality products at everyday low prices.

As of December 30, 2021, Lauren Concrete has delivered approximately 4,225 cubic yards (3,230 cubic metres) of concrete made with CarbonCure to this project, **reducing more than 90,000 pounds (41 tonnes) of CO₂ to date.** That's equivalent to 54 acres (22 hectares) of forest sequestering CO₂ for a year!

Fun Fact:

In December 2020, one of the Lauren Concrete trucks delivering concrete to the H-E-B Lake Austin project was the **one millionth truck** of CarbonCure concrete delivered to a sustainable building project!

Quick Facts

Concrete Supplier:
Lauren Concrete

Architect: Lake Flato Architects

Building Description:
110,000 ft² (10,219 m²)
two-level grocery store and underground parking garage

CO₂ Savings:
Estimated 110,000 pounds (50 tonnes)

Completion:
Target 2022
